

Water Treatment and Purification

Our thorough knowledge and expertise in available technologies make certain the most economical combination of equipment is provided. From clean process water for general industry, to 18 Mohm/cm systems for the microelectronics industry, the ISS integrated water treatment capabilities are at work to provide practical and effective solutions.

Membrane Systems

Most Common Systems:

- Demineralization (multi-bed, mixed bed, packed bed, electro-deionization, condensate polishing)
- Softening
- Filtration (multi-media, carbon, greensand, cartridge)
- Membrane Systems (reverse osmosis, ultrafiltration, nanofiltration, microfiltration)
- Degasification (forced draft, vacuum, membrane)

Filters

Our single source of responsibility guarantees a better quality product delivered to fit your specific needs. Furthermore, it means the service doesn't end at the time of purchase. We're here to backup what we produce and see that you get what you need and when you need it.
